Ain-Shams, Cairo

Career Objective

A fresh ICT Graduate, I find interest and passion in many fields software development, robotics, and embedded systems, and personal interest in game development and UI&UX which are all fields that let me explore creativity and technicality together. I have proven ability to translate academic knowledge into functional projects, including AI-driven applications and robotics control systems. Eager to contribute technical expertise and learn more within organizations.

Education

Bachelor of Information and Communication Technology Software Track **2022- 2026**

New Cairo Technological University – Faculty of Industry and Energy Technology

- Degree: Excellent
- GPA: 3.5/4

Technical Skills

-
- Programming: Python, C, C++, Java, JavaScript, PHP, Dart.
 - Development: Flutter (App Dev), Front-End & Back-End Development, Unity (Game Dev), C#, UI/UX Design.
 - Systems & Data: Embedded Systems, Database Management (MySQL, Firestore).
 - Tools: Jira, Figma, NET Framework, postman, Wireshark, Android Studio, Unity.
 - Languages: English (C1 Proficiency).

Projects

CouBot Delivery Robot - Graduation Project

Sep 2025- Jul 2026

Developed a delivery robot integrated with a mobile ordering application and a centralized web-based monitoring system.

Robotic Spray Painting Arm

Apr 2026

Designed and implemented a robotic arm capable of precision spray painting via hand controller.

UI/UX Design of Restaurant Management Dashboard (Web)

[Figma](#) **Apr 2026**

Designed a comprehensive administrative dashboard for restaurant operations, featuring data visualization for sales rates, inventory management, and product tracking.

UI/UX Design of Mobile Food Ordering App

[Figma](#) **Dec 2025**

Created high-fidelity wireframes and user-centric prototypes in Figma, focusing on intuitive navigation, seamless checkout flows, and accessible design for the ordering experience.

UI/UX Design of Mobile Food Ordering App (.NET Desktop Application & Figma Design) [Figma](#) **Dec 2025**

Developed a fully functional desktop interface using C# and .NET, featuring dual-access views: a customer-facing ordering interface and an employee-only backend for menu management, real-time pricing updates, and media integration.

Milo's Adventure (2D Game)**Aug 2025**

Developed a fully functional 2D adventure game featuring custom animation, sound design, and complex level architecture using Unity and C#.

Hadeity App**Apr 2025**

Built a cross-platform mobile application to share gift lists between friends, using Flutter and Firestore, focusing on intuitive UI/UX design.

Embedded Systems Documentation**Apr 2025**

Collaborated on an extensive technical manual documenting 16 custom-built embedded system circuits using PIC & Arduino Microcontrollers.

Virtual Mouse - Semi Graduation Project**Oct 2023 - Jul 2024**

Engineered a gesture-controlled virtual mouse using AI models and computer vision techniques.
